 - Call For Papers

We're always looking for speakers!

If you don't have a topic, that's okay! We can work with you to come up with one or collaborate together on a talk.

And if you're interested in being a part of our show & tell, let us know so we can slot you in a future meetup!

Reach out to us at vuejsdc@gmail.com!

Many thanks to our
gold sponsor
POLITICO

Vue CLI 3 Walkthrough

Christian Guirrerri
Senior Front-End Developer
POLITICO

Why Vue CLI 3?

Full Rewrite:

- Zero config
- Best practices by default

Default Features:

- Pre-configured webpack
- ES2017
- PostCSS
- Auto-generated HTML
- Environment modes & variables
- **Modern mode**
- Multiple Pages
- Build targets

Optional Features:

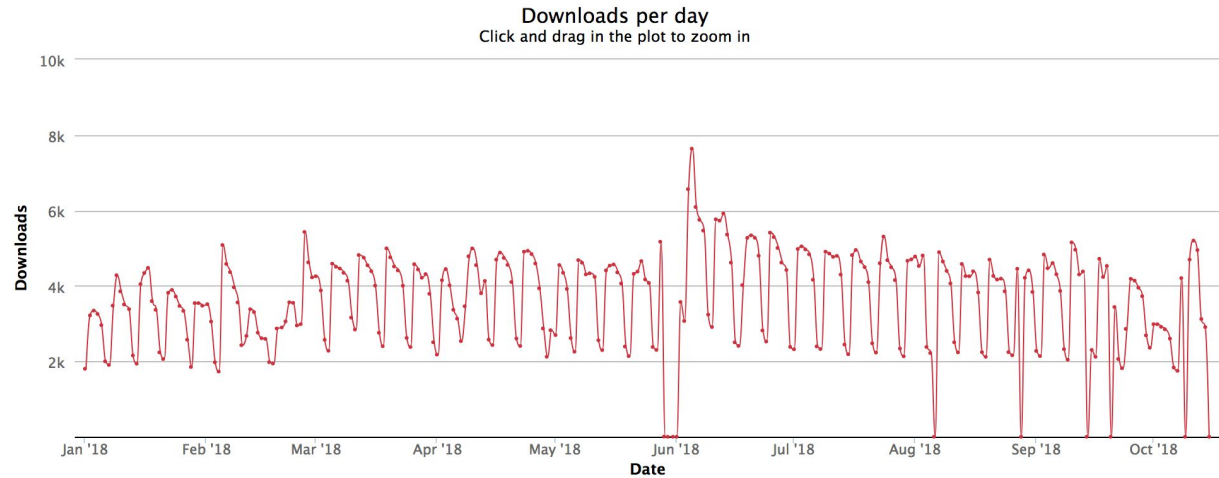

- TypeScript
- Progressive Web App
- Vue Router
- Vuex
- Linting: ESLint / TSLint / Prettier
- Unit Testing: Jest / Mocha
- E2E Testing: Cypress / Nightwatch

And More...

- Presets (Templates)
- Plugin API
- GUI
- Prototyping

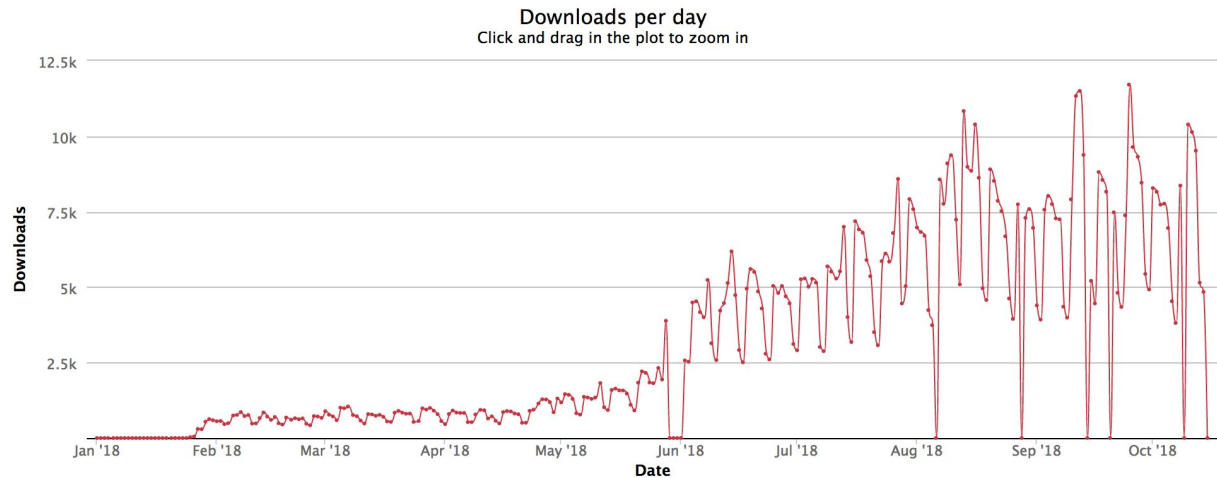

Adoption

Vue CLI 2.x

Adoption

Vue CLI 3.x

Installation

```
npm install -g @vue/cli
```

```
yarn global add @vue/cli
```

Create a project (command line)

```
> vue create my-project
```

```
Vue CLI v3.0.5
```

```
? Please pick a preset: (Use arrow keys)
```

```
  default (babel, eslint)
```

```
› Manually select features
```

Create a project (command line)

```
> vue create my-project
```

```
Vue CLI v3.0.5
```

```
? Please pick a preset: Manually select features
```

```
? Check the features needed for your project: (Press <space> to select, <a> to toggle all, <i> to invert selection)
```

- ☒ Babel
- ☐ TypeScript
- ☐ Progressive Web App (PWA) Support
- ☐ Router
- ☐ Vuex
- ☒ CSS Pre-processors
- ☒ Linter / Formatter
- ☐ Unit Testing
- ☐ E2E Testing

Create a project (command line)

```
> vue create my-project
```

```
Vue CLI v3.0.5
```

```
? Please pick a preset: Manually select features
```

```
? Check the features needed for your project: Linter
```

```
? Pick a linter / formatter config:
```

```
  ESLint with error prevention only
```

```
  ESLint + Airbnb config
```

```
  > ESLint + Standard config
```

```
  ESLint + Prettier
```

Create a project (command line)

```
> vue create my-project
```

```
Vue CLI v3.0.5
```

```
? Please pick a preset: Manually select features
```

```
? Check the features needed for your project: Babel, CSS Pre-processors, Linter
```

```
? Pick a CSS pre-processor (PostCSS, Autoprefixer and CSS Modules are supported by default): Sass/SCSS
```

```
? Pick a linter / formatter config: Standard
```

```
? Pick additional lint features: Lint on save
```

```
? Where do you prefer placing config for Babel, PostCSS, ESLint, etc.? In dedicated config files
```

```
? Save this as a preset for future projects? Yes
```

```
? Save preset as: Linting and SASS
```

Create a project (presets)

```
> vue create my-project
```

```
Vue CLI v3.0.5
```

```
? Please pick a preset: (Use arrow keys)
```

```
› Linting and SASS (sass, babel, eslint)  
  default (babel, eslint)
```

```
  Manually select features
```

Create a project (presets)

System Preset

```
> vue create my-project -p "Linting and SASS"
```

Create a project (UI)

```
> vue ui
```

Create a new project

Features

Configuration

You will be able to add features after the project is created by installing plugins.

Enable features

Babel

Transpile modern JavaScript to older versions (for compatibility)

More Info

TypeScript

Add support for the TypeScript language

More Info

Progressive Web App (PWA) Support

Improve performances with features like Web manifest and Service workers

More Info

Router

Structure the app with dynamic pages

More Info

Vuex

Manage the app state with a centralized store

More Info

CSS Pre-processors

Add support for CSS pre-processors like Sass, Less or Stylus

More Info

How does one uninstall a plugin? #2540

 Open

Worthaboutapig opened this issue 28 days ago · 11 comments

Worthaboutapig commented 28 days ago

+ 😊 ...

What problem does this feature solve?

There does not appear to be any way to remove a plugin in `vue ui`. The list of plugins on the dashboard don't have a trash icon next to them, as the dependencies list do have. There's no information on whether it's even possible to remove a plugin.

Remove a plugin

```
> vue remove @vue/eslint
```

Not quite...

[\[link\]](#)

They aren't install-only: you can uninstall them using yarn or npm and clean up the files they added/modified (for example with git). My point is there isn't an automatic way of doing this, we don't have an IA to do that (yet?).

Ok.

Create a plugin

- preset.json: Define a project without needing command prompts.
`vue create`
- generator.js: Modify contents and configurations of project files.
`vue create` (if included with preset.json)
`vue invoke`
- index.js: Modify the webpack config.
`vue-cli-service`
- prompts.js: Modify options based on user input.
`vue invoke`

Create a project revisited

System Preset

```
> vue create my-project -p "Linting and SASS"
```

```
> vue config
```

```
~/vuerc
```

```

}
```

Create a project revisited

System Preset (~/.vuerc)

```
> vue create my-project -p "Linting and SASS"
```

Local Preset

```
> vue create my-project -p ../presets/linting-sass.json
```

Create a project (presets)

Remote Preset (GitHub)

```
> vue create my-project -p guirreri/vue-dc
```

Remote Preset (GitLab)

```
> vue create my-project -p gitlab:guirreri/vue-dc --clone
```

Remote Preset (Bitbucket)

```
> vue create my-project -p bitbucket:guirreri/vue-dc --clone
```

Issues with private Bitbucket / [download-git-repo](#)

Create a preset

- Initialize an npm package.
- Open ~/.vuerc
- Copy your preset to a preset.json file in your package's root.
- Create and test a new project using the local preset:

```
> vue create -p <package-folder> <project-name>  
> npm run serve
```

Create a plugin

- Create index.js.

Create a plugin

- preset.json: Define a project without needing command prompts.
`vue create`
- generator.js: Modify contents and configurations of project files.
`vue create` (if included with preset.json)
`vue invoke`
- index.js: Modify the webpack config.
`vue-cli-service`
- prompts.js: Modify options based on user input.
`vue invoke`

Create a plugin

- Create index.js.
- Create generator.js.

Create a plugin

- preset.json: Define a project without needing command prompts.
- Create `vue create.js`.
- generator.js: Modify contents and configurations of project files.
`vue create` (if included with preset.json)
`vue invoke`
- index.js: Modify the webpack config.
`vue-cli-service`
- prompts.js: Modify options based on user input.
`vue invoke`

Create a plugin

- Create index.js.
- Create generator.js.
- Add the plugin to your project locally for development:

```
> yarn add ../vue-cli-plugin-vuedc-init
```
- Invoke the plugin:

```
> vue invoke vuedc-init
```
- Re-add and re-invoke to test the plugin.

Create a plugin

- Add `api.render` to `generator.js`.
- Add a template folder and modify some files.
- Re-add and re-invoke to test the plugin.

Create a plugin

- Add prompts.js.

Create a plugin

- `preset.json`: Define a project without needing command prompts.
`vue create`
- `generator.js`: Modify contents and configurations of project files.
`vue create` (if included with `preset.json`)
`vue invoke`
- `index.js`: Modify the webpack config.
`vue-cli-service`
- `prompts.js`: Modify options based on user input.
`vue invoke`

Create a plugin

- Add prompts.js.
 - Based on [Inquirer.js](#)

Questions?

Thanks everyone for
coming and hope to
see you at the next
meetup!

If you need support on a day to day, we got you.

Make sure to:

- Check out our Discord channel (<https://discordapp.com/invite/6MZWP8z>)
- Bookmark our site (<https://www.vuedc.io>)
